HUSABERG SPECIAL EDITION „FORCE“

Dear Press Representative,

We are glad to announce the HUSABERG Special Edition Model "FORCE".

Most of the HUSABERG riders are professional racers or advanced amateurs. These riders have a favour for special details on their race machines. Exactly for this reason we have brought up the „FORCE“ models series with all its different special features, that will make the riders heart beat.

HUSABERG is different –HUSABERG „FORCE“ is one step ahead.

Our experiences in world championship racing are directly led over to the series production models, not on the long run, but directly and fast. As you would expect it from a real HUSABERG.

All bikes of the „FORCE“ -series are equipped with advanced technical parts like the special triple clamp, the WP forks with polished springs and the chromium-plated piston rod. The forks are also equipped with a pre-load adjuster and there is an extra overflow reservoir for SM models. Also the plastics and decals are exclusive parts only for this series and are not available in the regular after sales. In addition the rider will also find some special accessory parts from the FORCE parts catalogue in this exclusive package. All details are mentioned separately in the documents attached.

The „FORCE“ edition is for a total of 511 motorcycles – no more, no less. This is our definition of a limited series. All motorcycles are EU homologated and will be available in summer 2004. The FORCE series will include the following models:

ENDURO: FE450s, FE501s, FE550s
SUPERMOTO: FS450s, FS650s

For any questions or wishes please contact your national HUSABERG distributor. You will find all contact information on our HP: www.husaberg.cc/dealers.

Best regards
